

CTE Programs

THROUGH GCC CTE PROGRAMS IN GUAM PUBLIC HIGH SCHOOLS

How the GCC CTE programs work to create pathways from high school to GCC

GCC now offers 12 secondary CTE programs to varying degrees in six of Guam's public high schools:

- Automotive Service Technology
- Automotive Collision Repair Technology
- AutoCAD
- Construction Trades
- Early Childhood Education
- Electronics Technology
- Health Careers & Sciences
- Lodging Management
- Marketing
- ProStart (Culinary)
- Telecommunications
- Visual Communications

Students who:

- Enroll in these CTE programs from sophomore through senior year,
- Earn a grade of "B" or better in their CTE courses all three years, and
- Successfully participate in the 180-hour work experience component of the program,

will earn a Certificate of Mastery upon graduation. Through GCC's Dual Credit Articulated Programs of Study (DCAPS), the student can earn from six to 19 credits (depending on the program) that will carry over to a corresponding GCC postsecondary program if they declare that program as their major upon enrollment at GCC after graduation from high school.

Information on the GCC CTE High School Work Experience Program

GCC Pathways from Secondary CTE Programs to Postsecondary Certificate or Associate Degree Programs

Secondary CTE Program	Credits possible	Postsecondary Program
Automotive: Collision Repair & Refinishing Technology	under review	Automotive Service Technology
Automotive Services Technology	15	Automotive Service Technology Med-Heavy Truck Diesel Technology
Construction Trades - AutoCAD	6	Pre-Architectural Drafting Civing Engineering Technology Surveying Technology
Construction Trades - Carpentry	9	Construction Technology
Early Childhood Education	6	Early Childhood Education
Electronics Technology	7	Computer Networking Computer Science
