iOS SOP:

[iOS Standard Operating Procedures](#) [3]

The iOS Standard Operating Procedures (SOP) has been developed by the Academic Technologies (AT) office to assist departments and programs in the acquiring of iOS devices, most notably iPads but to a lesser degree, iPod Touches and iPhones.

Please note that, as stated in the SOP, all iOS devices coming in to the college go through the AT in order to have an Apple account created specifically for it. All recipients must go through training. All must sign a document stating GCC's and the user's responsibilities.
