Disclaimer

The data presented in this Fact Book were gathered from numerous administrative departments. Data entry duplication and discrepancies were frequent. Further, common definitions and standards were lacking. Despite these limitations, the GCC Fact Book is an attempt to present a comprehensive profile of the entire college. Given the purpose of this publication, the Guam Community College Fact Book represents the best information available at this time.

History of the College

The Guam Trade and Guam Technical High School began in 1959, offering students specialized training in various vocational education fields. In November 1977, the Guam Community College was established through Public Law 14-77, which absorbed both the Guam Trade and Guam Technical High School program and the Guam Vocational High School Program of the Department of Education.

The College operates secondary and postsecondary vocational programs, adult and continuing education, community education, and short-term specialized training. These programs are delivered both on and off-campus, in satellite programs and on site at businesses as needed. The College also serves as the State Board of Control for vocational education under the United States Vocational Education Act of 1946, 1963, and subsequent amendments. The College offers over 50 courses of study which are job related, and prepares students for transfer to four-year colleges and universities with advanced standing in professional and technical degree programs.

The College offers a variety of community service and special programs to prepare students for college experiences including English as-a-Second Language, Adult Basic Education, General Education Development (GED) preparation and testing, and an Adult High School Diploma program.

Vision

Guam Community College will be the leader in bringing together government agencies, business and industry, community interest groups, and education and training entities to help develop a technically competent work force of the quality and depth required to attract the necessary elements to finance and create a more diversified economy. Students, employers, and government leaders will look to GCC's excellent faculty, staff, and administrators for technologically current training and for answers to questions about employability, new technology, assessing outcomes, and effective planning. GCC will be a model to other colleges and agencies by demonstrating integrity, honesty, and openness. The college will form effective partnerships with industry and government. It will be a champion for finding responsible funding from reliable sources to meet its obligation of public trust.
